ABOUT THE PRODUCT

The Ultra THB Actuator by SALUS Controls revolutionizes underfloor heating installations with its calibration-free operation, ensuring seamless valve opening and prompt closure based on heat demand.

Combining the precision of a standard thermal actuator with a high-speed motor, it delivers enhanced performance and control. Backed by extensive testing, this actuator excels in balancing under diverse conditions, providing adaptability to varying scenarios.

With a user-friendly bi-color LED indication system, the Ultra THB Actuator ensures optimal comfort, energy efficiency, simplified installation, and reliable balancing for a superior underfloor heating experience.
